

Import Marian Calendar into Google Calendar for Androids

You can set up an automatic feed of Marian Calendar events into your Google calendar. Please note that these events will be **read-only** in your Google calendar application.

To set up an iCal feed from the Marian Calendar into your Google Calendar,

1. Login to Google Calendar -> Go to lower left-hand side "Other Calendars" -> Click the dropdown arrow next to "Other Calendars" and Select "Add by URL" -> Paste the Marian Calendar iCal url listed below into the Google URL field -> Select if you want the Calendar to be publicly accessible on Google -> Click [Add Calendar]
2. You will now see your Marian Calendar events appear on the list of "Other calendars." Click on Settings to change the name of the calendar and other features. Google only refreshes calendar subscriptions every three hours so changes to your Marian Calendar will not appear during this delay period.

Note: You cannot make changes to your Marian Calendar from Google, though can set reminders for Marian Calendar events in Google.
