

Import Marian Calendar into Mac's iCalendar

You can set up an automatic feed of events from the Marian Calendar into your Mac's iCalendar. Please note that these events will be **read-only** in your Mac's calendar application.

1. Go to your Mac and from the "Calendar" menu, select "Subscribe..."
Copy the Marian Calendar iCal link listed below and paste it in the "Calendar URL" area in iCal. Then click the "Subscribe" button.
2. We recommend setting the "Auto-refresh" to at least "Every week" to ensure you have the latest version of the calendar. Then click "OK."

The Calendar you chose should now appear in the Subscriptions section in iCal.
