Next, locate your calendar bookmark (in the local bookmark folder) and press and hold your finger on the bookmark. You'll see a new menu appear and in the list select option to "Add to home screen" or "Add shortcut to home screen."

Option 2: if option #1 didn't work, some android phones allow you to add a bookmark to a home screen by doing a long press (for a few seconds) in a blank spot on the home screen > click the "Add Shortcut" . Then select your calendar bookmark.
