Microsoft XBox

1. Turn on your Xbox console with no game disc in the disc tray.
2. From the **Xbox Dashboard**, choose **Xbox Live**.
   These steps assume you cannot connect to Xbox Live until you finish configuring your Xbox console to use your PC's MAC address. Therefore, you should receive the following message: "Could not connect to Xbox Live. Do you want to troubleshoot your network connection?".
3. From the **Connect Status** screen, select **Settings**.
4. The 12-digit number at the bottom-right corner of the **Network Settings** screens is the MAC address of your Xbox console. Do not change your Xbox console MAC address, just write it down so that you can use it later.

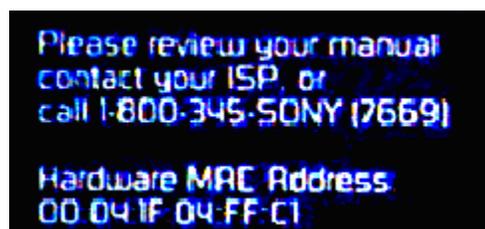

Microsoft Xbox 360

1. Go to the System area of the Xbox Dashboard and select **Network Settings**.
2. Select **Edit Settings**.
3. Under **Basic Settings**, check to make sure the **IP Settings** is on **Automatic**.
4. Now go to **Additional Settings**, select **Advanced Settings**.
5. At the bottom of this screen you'll see a heading called **Wired MAC Address**.

Sony PS2

1. Load the Start-up CD in your PS2.
2. Make sure you have the network cable disconnected.
3. Walk through the Start-Up CD until it starts testing your connection. Since we disconnected the network cable the test will fail.
4. You can now press the **select** button which will display the MAC.
5. The 12-digit number is the MAC address of your PS2, write it down so that you can use it later.

Sony PS 3

1. Power up the PlayStation 3 without any disc in the drive.
2. Once the PlayStation 3 operating system has loaded, select **Settings**.
3. Once you are in **Settings** select **Network Settings**.
4. When the **Network Settings** list appears, select the first option which is titled **Settings and Connection Status List**.
5. The physical address will be listed under **MAC Address**.

Nintendo Wii

1. From the Wii Channel menu, select "Wii Settings" (the round button on the bottom-left of the screen with "Wii" on it).
2. Select "Internet," then "Console Settings."
3. The MAC address of the Wii console is displayed on the first line.

Microsoft Xbox One

1. Navigate to the Settings page
2. Select Network
3. Select Advanced Settings
4. MAC address will be listed next to Wired MAC on the right hand side of the screen.

Sony Playstation 4

In many network configurations, you will need to know the MAC address of our console. Follow these steps through the XMB on the PS4 to find this value.

1. On the XMB, arrow up to the very top until we see the XMB Menus.

2. Scroll over to the right to **Settings**

3. Go down to **Network**
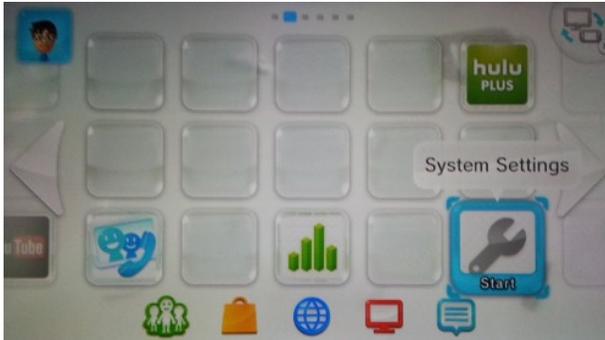

Then down to **View Connection Status**

From this area, we can get the WiFi and Ethernet MAC Address.

Wii U
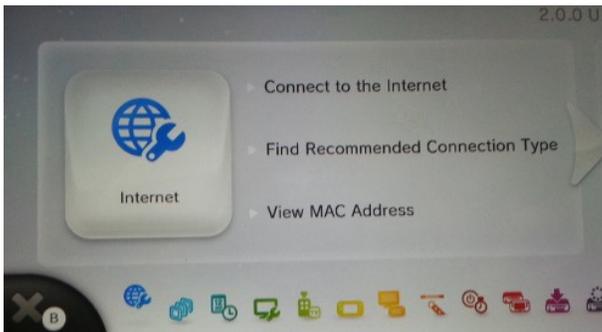

1. On your Wii U, go to **System Settings**.

2. Tap on the **Internet** settings button.

3. Next, select the **View MAC Address** option.
